Feature	Generative AI	<u>AI Agents</u>	Agentic AI
Primary Function	(Generates new content (text, images, videos, code).)	Performs <u>specific predefined tasks</u> automatically.	Plans, reasons and acts independently toward a <u>goal</u> .
Dependency	Works based on trained data.	Depends on <u>predefined rules and APIs</u> .	Uses <u>reasoning, planning and feedback loops</u> .
Tool Access	No real-time access to tools or APIs.	Limited <u>access to tools</u> for specific actions.	Dynamic <u>access to multiple tools and APIs</u> .
Learning Capability	Learns from historical data (not real-time).	No continuous learning; <u>follows instructions</u> .	Continuously <u>adapts to context and outcomes</u> .
Example Use Case	Writing articles, creating designs.	Fetching <u>flight data</u> or <u>sending alerts</u> .	Booking flights based on preferences and constraints.
Autonomy Level	Low	Medium	High

The Digital Personal Data Protection (DPDP) Act, 2023 is India's comprehensive privacy law regulating how businesses ("Data Fiduciaries") handle individuals' ("Data Principals") digital information. Fully operationalized with the 2025 Rules, it requires clear consent, enforces data erasure rights, and penalizes non-compliance with fines up to ₹250 crore. Seprite +5
